

Website of the Month

Anything with an outrunner motor and ESC will fly. Don't believe me? Well, click on this month's website called HaddadRC. HaddadRC is a very entertaining website with plenty of pictures and videos that will prove that anything with an outrunner motor and ESC will fly. Thanks to John Backes for submitting this website. Here is the link:

RC Engine Bearing Replacement

The weekend of the mall show I replaced the bearings in an OS 46 AX. Since this was my first time replacing bearings in a RC engine, I searched around for as much information as I could find. Replacing bearings is not by any means rocket science, but knowing a few tricks sure does make the job easier. Several CVA members gave me some good advice (Thanks to all!) and I found some information online. Here are some links to an article and videos for replacing RC engine bearings:
